## **The Acoustic Revive RWL-3 Acoustic Panel/Conditioner**

These are without a doubt the most effective acoustic room treatment I've auditioned. These panels completely transformed my listening environment by further revealing the natural depth flow within each recording. Moreover, these panels sonic capabilities are matched by their meticulous build. They're easy on the eyes and adds a "I'm serious" look to your listening room. I have owned just about every type acoustic panel on the market today, the Acoustic Revive RWL-3 Acoustic Conditioners bests the competition quite easily and without fanfare. They are not cheap but consider them a must-have for anyone seeking to tame their sonic space.
